

Fermentor System

1. Fermenter Descriptions of Fermentor System

Non-jacketed and jacketed beer fermenter tanks price are also called CCT's (Cylindrical Conical Tanks), FV's (Fermentation Vessel), beer fermenter, beer fermentation tanks, primary fermentor or unitanks, as they are used both for fermenting and lagering.

The material is stainless steel 304, Stainless steel 316L can be choosed for special request.

Fermenting is the process during which the yeast transforms the wort into beer.Lagerings takes place after fermenting and is the time given to the beer to stabilize and age after fermenting.TBE stainless steel fermenters can be individually temperature controlled through glycol jackets and are mostly equipped with accessories such as overpressure and under pressure valve,CIP cleaning jet, sanitary sample valve, manhole,etc.

2. A serials of the Fermentor System

Fermentation tank series	Volume in US Gallon	Diameter	Height
100l Fermentation tank	26US Gallon	640mm	1500mm
200l Fermentation Tank	53US Gallon	760mm	1800mm
300l Fermentation Tank	79US Gallon	860mm	2000mm
500l Fermentation Tank	132US Gallon	960mm	2350mm
1000l Fermentation Tank	264US Gallon	1260mm	2650mm
2000l Fermentation Tank	264US Gallon	1560mm	3150mm
3000l Fermentation Tank	528US Gallon	1800mm	3550mm
5000l Fermentation Tank	1321US Gallon	200mm	4450mm
10000 Fermentation Tank	2642US Gallon	2200mm	6100mm
